PRODUCT INFORMATION

Titan IMS provides you a cost effective solution for your retail owning a single or multiple outlets.

Titan IMS has an integrated Bar Code Module capable of generating the Bar Code labels for all types of products. The system maintains all data related to sales and returns.

The system is capable of managing stocks at multi locations and one can easily view these stocks.

LOGIN

The system provides an authentication system which checks the privileges of the users to do a certain task. The system includes logging module which logs all the activities carried out by the user.

Empower your business the **Titans** way!...

ITEM & ITEM RELATED INFORMATION:

System provides a detailed and user friendly form to define an item and item related information like

Item Name, Category, Brand, Color, Technical details, Weight, Retail/Cost Price, Opening Stock, Piece/Carton, item reorder level, add/delete image and barcode also.

There is a toolbar on top of each form, containing the basic add, edit, delete, search, cancel options. This gives a user friendly and easy way to manipulate the

Empower your business the **Titans** way!...

information as per user requirements.

INVOICING:

Titan Inventory Management system integrated with POS (Point of Sale) terminals which facilitate all the operations to be performed by sales staff at retail outlets. POS is very easy to use and can be operated by salesman who are not very educated.

Following are some basic operations which a user can perform with the Invoice form:

- Generation of Invoices
- Sales & Return
- Multiple POS Options
- Auto Discount Calculation
- Auto Pricing Calculation
- Auto Clients Balancing
- Auto Salesman Performance
- Credit Card Option
- On Account Receiving etc

EDIT INVOICE:

If a user wants to edit an invoice, a comprehensive search engine is given. The list contains all invoices stored in the database.

The screenshot shows a web application window titled "Invoices". At the top, there is a search bar with the text "Invoice Number" and a search button. Below the search bar, there is a table with the following columns: ItemReceipt_No, Invoice_Date, CustomerId, OnCash, OnAccount, OnCreditCard, CardType, CardNumber, and AccountNumber. The table contains one row of data: 25042008-INV2, 4/25/2008 11:19, TRUE, FALSE, FALSE, and empty cells for CardType, CardNumber, and AccountNumber. There is also an "Edit Invoice" checkbox next to the search bar.

ItemReceipt_No	Invoice_Date	CustomerId	OnCash	OnAccount	OnCreditCard	CardType	CardNumber	AccountNumber
25042008-INV2	4/25/2008 11:19		TRUE	FALSE	FALSE			

PURCHASE:
